

Multi-protocol print server
1 USB printer port
1 RJ45 port for LAN of 100 Mbps connection
Web SNMP configuration

This Print Server is composed of 1 port for USB printers (compatible with ver. 2.0) and 1 RJ45 Ethernet port of 100 Mbps.

Multi-protocol, which can support TCP/IP, NetBEUI and AppleTalk, which ensures the compatibility with Windows, Unix and Macintosh platforms.

Management.

The SNMP management can be configured and administrated via Web browser or via the application under Windows Advance MIB-II.

Its firmware is perfectly capable of being updated, which guarantees compatibility even with the printers that will appear in future.

Standards

IEEE 802.3 100Base-T.
USB 1.1.

Ports number

1 RJ45 10Base-T port.
1 USB 2.0/1.1 puerto

Management

Easy configuration via Web or software.
Standard: MIB-II (RFC 1213) for SNMP Management.

Bidirectional protocol support HP P.J.L.

Easy upgradeable firmware.

Protocol network support: TCP/IP, NetBEUI, AppleTalk

Security/EMI: FCC and CE standard.
