

WP-101U

G Wireless Print Server

1 USB print port

e-mail and FTP printing

UPnP, Web UI, SNMP, compatible 802.11g (54 Mbps.)

Index

5.13

1 USB 2.0 /1.1 port

The WP-101U is a wireless print Server of 54 Mbps. with a USB 2.0/1.1 print port. This combination makes it possible to rapidly print without cables and with a great deal of flexibility. It can function in point-to-point mode or in infrastructure mode with a data key of 64/128 bits. It can support the TCP/IP, SMB, NetBEUI, and AppleTalk protocols, ensuring the compatibility with the Windows, Unix, and Macintosh platforms.

Simple installation

The use of the installation CD makes the installation of this device a very simple process, for an assistant guides you in the configuration of the print server and in the installation of the drivers of the printers. Of the assistant is not used, the Universal Plug & Play directly shows the icon in "My Network Neighbor" in your computer. Clicking on all this, you can connect without having to know the configurations of IP addresses. Macintosh users will be able to enjoy a very simple installation thanks to the "MAC OS Rendezvous Zero Configuration".

Printing from Internet

This print server also permits a remote e-mail y FTP printing. It is therefore possible to send text files via Internet and the print server will remotely print them. This is the ideal alternative to the FAX for sending messages without having to turn the computer on.

Flexible management

The WP-101U offers flexibility in the configuration; one can click twice in the icon and use UPnP or use the Web management to configure the device. For network administrators, it can support SNMP MIB2. With the SNMP software, it is possible to configure and monitor the functioning.

Technical features:

- **Wireless**
 - Standards: IEEE 802.11g y 802.11b.
 - WEP 64, 128 bits. and WPA encryption.
 - Adhoc Infrastructure mode
 - "Search" function
- **Management:**
 - Assistant for the installation
 - Web navigator.
 - UPnP (Universal Plug-N-Play)
 - "Rendezvous Zero Configuration" in Mac OS 10.2
 - It can support the latest SNMP MIB-II standard management version
- **Ports:**
 - 1 USB 2.0/1.1 port
 - 1 RJ-45 port
- **Wi-Fi protocols supported:**
 - IEEE 802.11b (11 Mbps.)
 - IEEE 802.11g (54Mbps.)
- **Network protocols supported:**
 - TCP/IP, NetBEUI, AppleTalk
 - IPP, LPR, LPD, Email, FTP
 - BOOTP, TFTP
 - SMB, UPnP, Mac Rendezvous
- **Specials characteristics:**
 - Email Printing (ASCII)
 - FTP Printing (ASCII)
- **Operative system support:**
 - Windows: All
 - NetWare 5.x
 - Linux
 - HP-UX Unix, Sun O.S, Solaris, SCO Unix, AIX, Unixware
 - Mac OS
- **LED's:** Power, LAN, WLAN,
- **Certifications/EMI:** FCC and CE.
