Compatible with 47 standards

Hot Plug & Play

No power supply needed

Index

9.2

Multiple applications.

An ideal device for the transfer of information (digital images from video cameras, digital picture cameras, etc.) to the computer via the USB port. Besides, the user can see this reproducer/recorder to transfer digital data and images from any equipment to any of the memory cards that are compatible with this device, in order to comfortably move this information anywhere in a totally secure way.

High speed

The Transfer speed is ensured, for it uses the high speed of the USB version 2.0 bus, which can reach up to 480 Mb/sec.
